ARTHUR HALE / OLD FARMING

The Weekly Garden Walk

A few observations. A little more understanding.

□ Look at the whole plant

New growth, older leaves, stems and leaf undersides.

□ Check before watering

Use the crop's needs and the growing mix, not the day of the week.

□ Check the container

Clear drainage outlets and standing saucer water in ordinary pots.

□ Write one useful observation

A change, a date, a question, or what you did and why.

□ Choose one next step

A small, considered action. Sometimes that is waiting.

Date / one next step
